This documentation covering version dev-master has been rendered at: Apr 19, 2018

# CHAPTER 1

---

## Introduction

---

This package has very sparse documentation until now. You should fix this!

---

### Some markup examples

---

Backticks make for *inline code* and code blocks can be in various languages like YAML:

```
TYPO3:
  Neos:
    Seo:
      twitterCard:
        siteHandle: '@neoscms'
```

or PHP:

```
1 $foo = new Bar();
2 $drink = $bar->getKeeper()->order('White Russian');
```
